

Need a Web-based Illustration System that's easy to implement?

Get your sales team moving with Expedite, *powered by COSS*. Getting your sales tools on the web couldn't be simpler.

Customer-Driven Solutions

Clients who actively participate in the development of their own financial models are more likely to agree with your producer's recommendations. Expedite features basic Needs Analysis, utilizing color presentations and graphs to help establish client goals and improve closing ratios.

Rapid Illustration Capabilities

Illustrations are the heart of the COSS Expedite system, featuring four product types to choose from: Term, Universal Life, Whole life and Annuities. Our dedicated quality assurance team, together with counsel from nationally recognized attorneys, ensures our accuracy and regulatory compliance.

The Power to Change

Keeping your rate files current shouldn't be a chore. With every Expedite system, your home office has the power to quickly review and change interest rates with just a few clicks. An integrated Rate File Maintenance tool is also included for easy access to your rate file data.

The Right Form at the Right Time

Do your producers spend more time searching for forms than they do submitting new business? With Expedite, powered by COSS, your producers have access to an up-to-date Forms repository that will keep them submitting instead of searching.

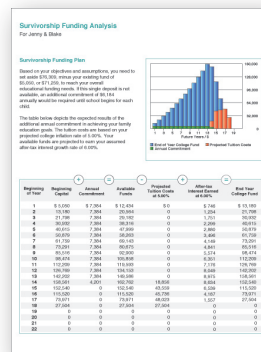

Future Projections

The Expedite system offers On-Anniversary Reproposal capabilities as required by the NAIC, allowing producers to run in-force illustrations in addition to new business illustrations. By entering current policy values, producers can quickly re-project what the policy will look like in years to come.

Expedite, *powered by COSS*, is a hosted solution with low annual license fees and attractive referral incentives.

System Includes:

- **Basic Needs Analysis**
- **Compliant Illustrations**
- **Rate and Interest Tools**
